Complete Listing of all Pending Claims:

1. (Currently Amended) A method of configuring a user interface of computer-assisted equipment according to a service program, comprising the steps of:

said computer-assisted equipment transmitting a message to a remote computer;

said remote computer determining that said service program available on said remote computer is suitable for use with said computer-assisted equipment, said determining being based on said message; and

said remote computer <u>transmitting said service program to said computer-</u> assisted equipment; and

said computer-assisted equipment configuring the user interface of said computer-assisted equipment influencing operation of said user interface of said computer-assisted equipment in accordance with said service program.

- 2. (Original) The method of claim 1, wherein said computer-assisted equipment provides entertainment.
- 3. (Original) The method of claim 2, wherein said computer-assisted equipment is an audio reproduction system.
- 4. (Original) The method of claim 1, wherein said computer-assisted equipment is a remote control device that controls functions of a video entertainment system, said video entertainment system receiving content from said remote computer.
- 5. (Original) The method of claim 1, wherein said determining step includes said remote computer informing said computer-assisted equipment that at least one additional service program is available, said computer-assisted equipment selecting from among said service program and said at least one additional service program.

- 6. (Original) The method of claim 5, additionally comprising said remote computer receiving a selection from said computer-assisted equipment, said selection indicating which of said service program and said at least one additional service program a user has selected.
- 7. (Original) The method of claim 1, wherein said remote computer is a general-purpose computer.
- 8. (Original) The method of claim 1, wherein said message is a service request that indicates that said computer-assisted equipment is ready to operate cooperatively with said remote computer.
- (Original) The method of claim 1 further comprising said remote computer transmitting content to said computer-assisted equipment under the control of said service program.
- 10. (Currently amended) In a computer-assisted appliance, a method for interacting with a remote computer that executes a service program, comprising the steps of:

transmitting a service request to said remote computer;

receiving an interface instruction that enables said remote computer to execute a portion of a particular service program;

transmitting a user input to said remote computer in accordance with said interface instruction; and

receiving content from said remote computer in response to said interface instruction, <u>and</u>

said computer-assisted appliance configuring the user interface of the computer-assisted appliance.

11. (Original) The method of claim 10, wherein said service request includes an indication that said computer-assisted appliance is available and is ready to receive said service program.

- 12. (Original) The method of claim 10, wherein said remote computer is one of a portable and a desktop computing device.
- 13. (Original) The method of claim 9, wherein said appliance is an audio system that conveys music, and wherein said content includes a music file.
- 14. (Original) The method of claim 13, wherein said user input is a selection of a title of said music file.
- 15. (Original) The method of claim 13, wherein said service program includes instructions that enable said audio system to display a list of music selections.
- 16. (Original) The method of claim 10, wherein said service program influences the function of a display located on said computer-assisted appliance.
- 17. (Original) The method of claim 10, wherein said service program influences a function of a remote control device used to control an entertainment device.
 - 18-23. (Claims 18-23 are canceled)
- 24. (Currently amended) In a remote computer, a method for cooperating with computer-assisted equipment, comprising the steps of:

receiving a request for service from said computer-assisted equipment; determining that a service program suitable for use with said computer-assisted equipment is available, said service program including an interface instruction;

transmitting said interface instruction to said computer-assisted appliance; and

cooperating with said computer-assisted appliance in accordance with said service program, wherein said service program configures the user interface of said computer-assisted equipment.

- 25. (Original) The remote computer of claim 24, wherein said determining step includes receiving a selection as to which service program has been selected by a user of said computer-assisted equipment.
- 26. (Original) The remote computer of claim 24, wherein said remote computer is interfaced to a network and wherein said remote computer communicates with a network location available on said network.
- 27. (Original) The remote computer of claim 24, wherein said transmitting step is accomplished by way of transmitting said interface instruction using a wireless interface.
 - 28-32. (Please cancel claims 28-32)
- 33. (Currently amended) One or more computer-readable media having computer-readable instructions thereon which, when executed by a computer, cause the computer to perform a method comprising the steps of:

receiving a service query from a computer-assisted appliance;

determining that an application a service program suitable for use with said computer-assisted appliance is available;

<u>said service program</u> configuring an <u>the user</u> interface of said computerassisted appliance; and

receiving information from said computer-assisted appliance, said information being conveyed from said interface and resulting from a user interacting with said interface.

- 34. (Original) One or more computer-readable media as recited in claim 33, wherein said receiving a service query step includes receiving an indicator that informs said computer of a function performed by said computer-assisted appliance.
- 35. (Currently amended) One or more computer-readable media as recited in claim 33, wherein said determining step includes said computer searching through a list of <u>service</u> application programs.

36. (Original) One or more computer-readable media as recited in claim 33, wherein said method further comprises said computer-assisted appliance prompting said user for said input.
